EU DIGITAL IDENTITY WALLET CONSORTIUM

Teemu Kääriäinen

Senior advisor at the Finnish Ministry of Finance
and Chair of the Functional WG in the Finnish
national eIDAS implementation project

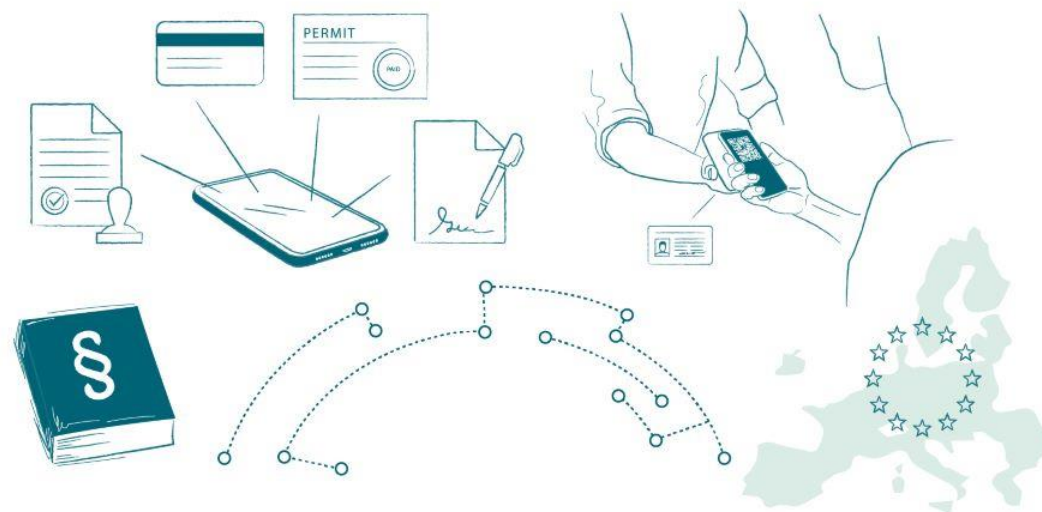

EUDI wallet use cases

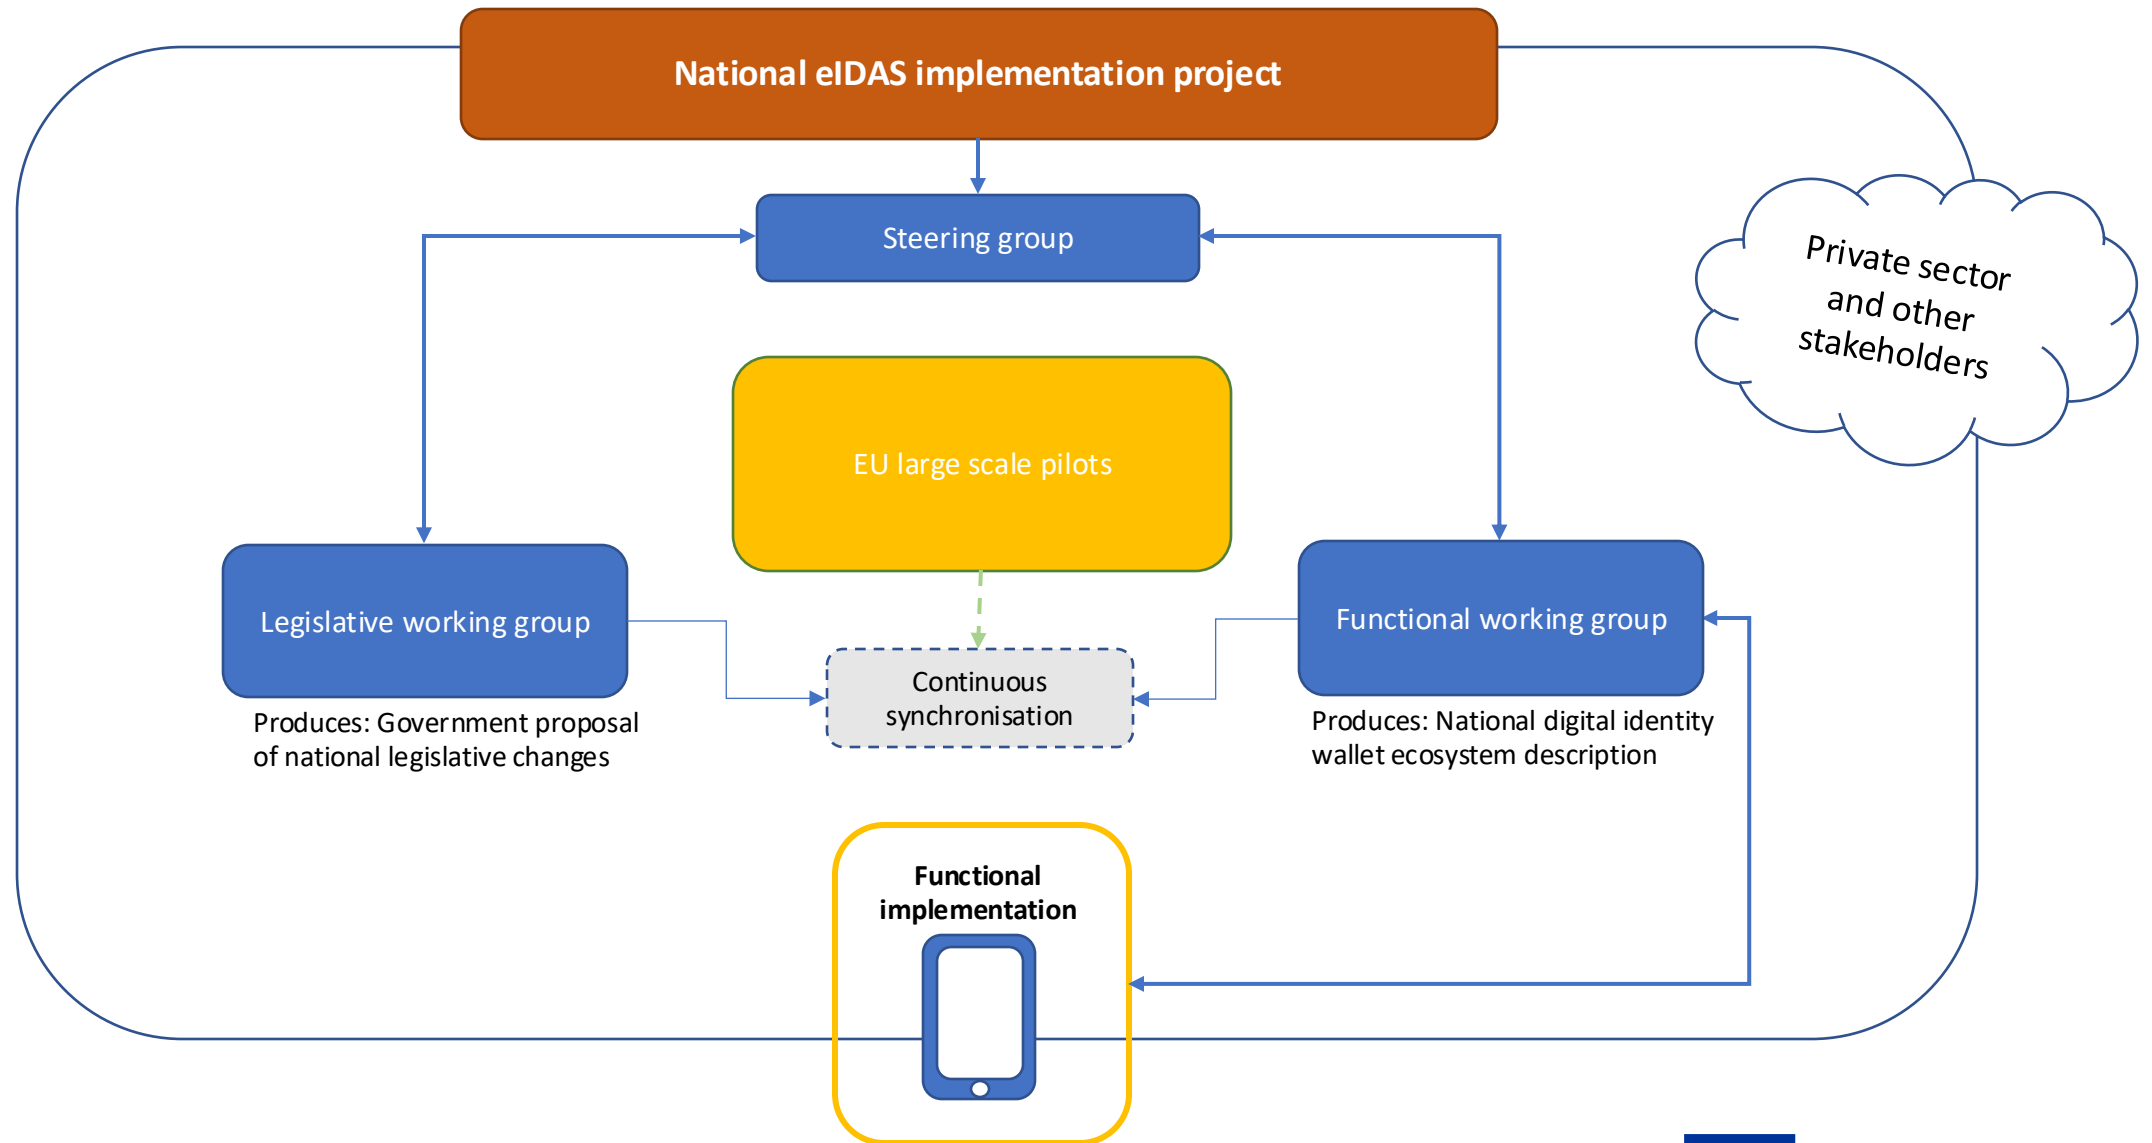

1. Electronic attestations of attributes
2. Electronic identification
3. Digital signing / sealing

Basic information of the project

- For the national implementation of the regulation-related obligations, a **project** has been launched by the **Ministry of Finance, Finland** for the period 26.4.2024-31.12.2026.
- The project has two working groups:
 - **Legislative working group** for the period 26.4.2024-30.6.2025
 - **Functional working group** for the period 26.4.2024-30.6.2026
- The Digital and Population Information Agency (DVV) is responsible for producing the **national digital identity wallet**.
- The project involves open and continuous **cooperation with various stakeholders** (incl. ministries, agencies and private sector actors).
- More information: <https://vm.fi/en/eidasregulation>

Project goals

- The project aims to:
 - **Ensures** that the **obligations** of the revised eIDAS Regulation are **implemented** within the deadline set by the EU.
- The project's basic objectives are also to:
 - Support the implementation of economically **sustainable electronic identification** for public sector services by creating the conditions for services in society in accordance with the revised eIDAS regulation and supporting their **widespread utilisation** and awareness.
 - Enables the implementation of a **digital ID document** as part of the wallet.
 - Promotes opportunities for **legal entities** to conduct **business electronically**.
- For more information, see <https://vm.fi/en/project?tunnus=VM031:00/2024>
